

Recording of a training...

Written by Eric HAMON

Wednesday, 11 June 2008 10:12 - Last Updated Monday, 29 June 2009 09:44

I thank warmly all the participants of the training of yesterday evening. The session, intense and spectacular, was filmed with a new digital recorder device. 'Rushes' will allow to build a video clip of about twenty minutes.

This last one will be played during the days of registration for the new season 2008-2009, during the fair to the associations which will take place the weekend of September 6th and 7th, 2008.

The video will be available on those who wish it. I shall speak about it in a next message.

In the meantime, I realized some photographic pictures to test the device. The comescope obviously has no qualities of a true camera. The quality of the images is thus a little bit weak. The aikido being a discipline where everything is in permanent and fast movements, I tried to take series of photos. The technical limits of the photographic mode of the comescope were reached. To you to judge.
